Electrify VGI

CHARGING AT VGI

It is now possible to charge your car here at VGI. To do so, you must use the Nextcharge app

HOW TO ACTIVATE THE CHARGING SESSION

Once you have parked your car in one of the dedicated parking spaces, **scan the QR code on the charging station** (on the side corresponding to the parking space occupied by the car)

At this point, **the app will open directly on the VGI charger**

It can be useful to add the charging station to **Favorites**
To do it, simply **tap on the heart icon** in the top left corner on the screen
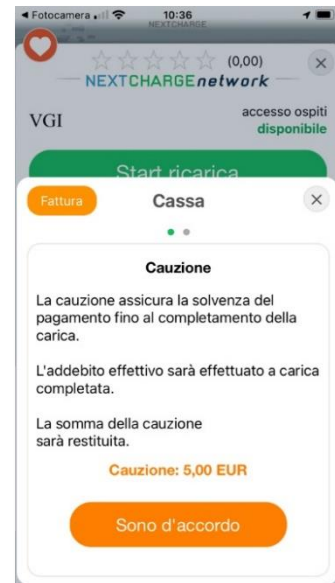

Now, tap "**Start ricarica**" (= start charging) and then **always select the first option** from the two displayed e poi

To confirm, **tap once more** "**Start ricarica**"

A **deposit of € 5.00** is required to start the charging session. The deposit amount will be returned once the process is completed, and then the actual amount of the charging session will be charged.

The last step concerns the **type of payment**.
Once the preferred option has been selected, the charging session will start.

Once the charging process is complete, please move your car, leaving the charger available to other people.
Users who have added the VGI charging station to their favorites will receive a **notification that the charging station is available** and can **book it - again via the app - by 'locking' it for up to 20 minutes**, during which they can start charging.
